PROFESSIONAL SUMMARY

Bilingual Software Engineer with 2+ years of experience specializing in full-stack web development, enterprise software architecture, and process automation within manufacturing environments. Proven track record in building scalable C#/.NET applications, React front-ends, and real-time Power BI analytics dashboards.

PROFESSIONAL EXPERIENCE

Inventec FIS <i>Software Developer</i>	Ciudad Juárez, Mexico Jun 2024 – Present
- Design, develop, and maintain 10+ internal web applications using ASP.NET Core MVC, C#, and SQL Server supporting logistics, quality control, warehouse management, and manufacturing operations plant-wide. - Build and deliver Power BI dashboards providing executive clients real-time visibility into factory performance, production metrics, and operational KPIs. - Create and optimize SQL Server stored procedures, Power BI dashboards, and data pipelines to drive data-driven decision-making for production and management teams. - Lead plant-wide digitization initiatives replacing paper-based workflows, projecting a 40% reduction in inspection processing time and significant cost savings across QA, Maintenance, Production, and Engineering departments.	
Columbus Industries <i>IT Engineer / Programmer</i>	Ciudad Juárez, Mexico Aug 2023 – May 2024
- Provided hardware and software support across 3 manufacturing plants in Juárez and remote U.S. sites, resolving 50+ tickets per month. - Diagnosed and repaired industrial scanners, Zebra label printers, PCs, and networked devices to minimize production downtime.	
Microsoft <i>Software Engineering Intern</i>	Redmond, WA May 2022 – Aug 2022
- Built a front-end mini-game for Bing Shopping using React and TypeScript to boost user engagement on product pages. - Implemented interactive UX features leveraging local storage and browser developer tools for seamless state management.	
Microsoft <i>Explore Intern</i>	Remote May 2021 – Aug 2021
- Co-developed a full-stack barcode scanner application using React and retailer APIs enabling real-time price comparison across stores. - Led Agile sprint planning, task breakdown, and feature implementation within a 3-person engineering team.	

EDUCATION

The University of Texas at El Paso (UTEP) <i>Bachelor of Science in Computer Science GPA: 3.48 / 4.0</i>	El Paso, TX Graduation: May 2023
--	-------------------------------------

PUBLICATION

Increasing Protein Multiple Sequence Alignment Parameter Advising Accuracy by Considering Secondary Structure Information Richart, H., DeBlasio, D. <i>bioRxiv</i> , Sep 2022 Presented at UTEP COURI Symposium

TECHNICAL SKILLS

Languages:	C#, Python, JavaScript, TypeScript, Java, HTML/CSS, SQL
Frameworks & Libraries:	ASP.NET Core MVC, React, Bootstrap, Three.js, QuestPDF
Databases & Data:	SQL Server, ADO.NET, Power BI, Stored Procedures
Tools & Platforms:	Git, Visual Studio, Linux, SAP (OPENQUERY), IIS

SELECT PROJECTS

KIRA: Checklist digitization system replacing paper-based inspections plant-wide; integrated with ticketing system for automated issue escalation. <i>(ASP.NET Core MVC, C#, QuestPDF, SQL Server)</i>
ZORO: Trailer loading and seal tracking system with 3D visualization, PDF proof-of-delivery generation, and complex carrier routing logic. <i>(C#, ASP.NET Core, Three.js, QuestPDF, SQL Server)</i>
Power BI Dashboards: Client-facing analytics dashboards providing real-time visibility into factory performance, production output, and operational metrics. <i>(Power BI, SQL Server, Stored Procedures)</i>
